---

Dear Parent and Physician:

The Pitt County Board of Education's Administering Medicine to Students Policy (6125) was developed to protect the safety and welfare of our students. The policy intent is to encourage that students take required medications prior to, or after, school hours. For those few medications, which need to be administered during school hours, Board policy requires completion of this **Authorization for Medication** form each school year and every time there is a change in medication dosage or time and frequency of administration. This form is valid for no more than one calendar year or 365 days.

The **Authorization for Medication** form is required for both short-term and long-term prescriptions and over-the-counter medications. It needs to be signed by the physician and the parent specifying the dosage, time and frequency of medication. If the need for over-the-counter medication is short-term (less than a week), only a parent's note is required that states the medication, dosage and time and frequency of administration. The parent always has the option to come to school and administer the medication.

**For students in grades K-8**, all medications, must be transported to school in the original container by the parent/guardian and administered by school personnel. For parents' convenience, it may be helpful to ask the pharmacist to label two containers, one for home and one for school. The only exception is that with prior documentation on the **Authorization for Medication** form students, who have permission to self-medicate, may carry rescue medications such as asthma inhalers, epi-pens or insulin.

**High school students (grades 9-12)** may transport and administer some of their own medications. Class 2 Controlled Substances shall be transported to and from school by parent/guardian for high school students and administered by school personnel. (Examples: Ritalin, Oxycontin, Percocet, Adderol, Concerta) In all cases of medication at school, prior proper documentation on the **Authorization for Medication** form including a physician's consent if a student can self-medicate shall be filed in the principal's/designee's office.

Two important points to remember are:

- Parents are responsible for informing the school principal of any serious changes in the student's health or any change in the medication to be administered. Changes in medication, including altered dosage and changes in time and frequency of administration, require authorization from the prescribing physician on an **Authorization for Medication** form.
- It is a privilege for students to be allowed to self-medicate during school hours. Abuse of this privilege shall result in its revocation.

Thank you for your assistance in providing the necessary documentation and care for our students. We share your concern for their health and safety as well as their academic success.

Sincerely,  
Pitt County Schools
